FINANCIAL STATEMENTS

NOTES TO THE FINANCIAL STATEMENTS

Q3 2026

I. BUSINESS OPERATIONS CHARACTERISTICS

1. Ownership Structure

Hanoi Beer Trading Joint Stock Company is a joint-stock company established under Business Registration Certificate No. 0103014976 dated December 8, 2006, issued by the Department of Planning and Investment of Hanoi City, and the new Business Registration and Tax Registration Certificate No. 0102111943, amended for the 14th time on August 14, 2025.

The company's headquarters is located at 183 Hoang Hoa Tham Street, Ngoc Ha Ward, Hanoi City, Vietnam.

2. Business Field

The company operates in the field of trade services.

3. Business Activities

The main business activities of the company include: Trading beer, alcohol, soft drinks, and materials and equipment for the beer, alcohol, and soft drinks industries; Operating restaurants and hotels (excluding karaoke rooms, nightclubs, and bars); Freight transportation; Trading by-products in beer production, including brewer's grain; Trading scrap and waste products from beer production; Business and leasing of factories, offices, warehouses, docks.

4. Normal Business Cycle

The company's normal business cycle is completed within no more than 12 months.

5. Corporate Structure

The Company had 102 employees as of September 30, 2026, compared to 104 employees as of December 31, 2025.

The company does not have investments in subsidiaries, joint ventures, or affiliates, and does not have dependent branches at the end of the accounting period for financial statement preparation.

6. Statement on the Comparability of Financial Information

The company has not changed its accounting policies from the previous year, therefore, there is no impact on the comparability of the financial information in the financial statements.

II. FINANCIAL YEAR AND CURRENCY UNIT USED IN ACCOUNTING

1. Financial Year

The company's financial year starts on 01/01 and ends on 31/12 annually.

2. Currency Unit Used in Accounting

The currency unit used in accounting records is the Vietnamese Dong (VND).

III. ACCOUNTING STANDARDS AND ACCOUNTING REGIME APPLIED

1. Applied Accounting Regime

The Company applies the Accounting Regime for enterprises issued under Circular No. 99/2025/TT-BTC ("Circular 99"), which provides guidance on the accounting regime for enterprises, promulgated by the Ministry of Finance on October 27, 2025.

2. Statement of compliance with Accounting Standards and Accounting Regime

The Company has applied the Vietnamese Accounting Standards and the relevant guidance documents issued by the State. The financial statements have been prepared and presented in full compliance with all applicable standards, guiding circulars, and the prevailing Vietnamese Accounting Regime for enterprises.

IV. APPLIED ACCOUNTING POLICIES

1. Principles for recognition of cash and cash equivalents

Cash includes cash on hand, demand deposits with banks, and monetary gold held for the purpose of preserving value, excluding gold classified as inventories used as raw materials for production or as goods held for sale.

Cash equivalents are short-term investments with an original maturity or recovery period of no more than 3 months from the date of acquisition, which are readily convertible into known amounts of cash and subject to an insignificant risk of changes in value.

2. Principles for recognition of financial investments

a) Held-to-maturity investments

Held-to-maturity investments are those for which the Company has both the intent and ability to hold until maturity. These include term deposits with banks (including treasury bills and promissory notes), bonds, redeemable preference shares that the issuer is obliged to repurchase at a specified future date, and other held-to-maturity investments.

Held-to-maturity investments are recognized from the trade date and initially measured at cost, including purchase price and directly attributable transaction costs. Interest income arising after the acquisition date is recognized in the Statement of Profit or Loss on an accrual basis. Interest accrued prior to the acquisition date is deducted from the cost at the time of purchase.

An allowance for impairment of held-to-maturity investments is recognized when there is objective evidence that part or all of the investment may not be recoverable. Such allowance is recorded as financial expenses in the period.

b) Investments in equity instruments of other entities

Investments in equity instruments of other entities represent investments where the Company does not have control, joint control, or significant influence over the investee.

These investments are carried at cost less any allowance for impairment.

3. Principles for recognition of trade receivables and other receivables

Receivables are presented at carrying amount less allowance for doubtful debts.

The classification of receivables into trade receivables and other receivables is based on the following principles:

- Trade receivables represent amounts due of a commercial nature arising from transactions, including receivables from entrusted export sales conducted through other entities.
- Other receivables represent non-commercial receivables that are not related to purchase and sale transactions.

Allowance for doubtful debts reflects the portion of receivables that the Company estimates may be impaired or irrecoverable at the end of the accounting period. Increases or decreases in the allowance balance are recognized as administrative expenses in the Statement of Profit or Loss.

Receivables are classified as short-term or long-term based on their remaining maturities.

4. Principles for recognition of inventories

Inventories are stated at the lower of cost and net realizable value.

The cost of inventories is determined as follows:

- Raw materials and goods: Include purchase cost and other directly attributable costs incurred to bring the inventories to their present location and condition.
- Finished goods: Include direct materials, direct labor costs, and allocated manufacturing overheads based on normal operating capacity.
- Work in progress: Include direct materials, direct labor costs, and manufacturing overheads.

HANOI BEER TRADING JOINT STOCK COMPANY
183 Hoang Hoa Tham, Ngoc Ha Ward, Ha Noi
FINANCIAL STATEMENTS
NOTES TO THE FINANCIAL STATEMENTS (continued)

Net realizable value is the estimated selling price of inventories at the end of the year less the estimated costs of completion and the estimated costs necessary to make the sale.

Inventory cost is determined using the weighted average method and accounted for under the perpetual inventory system.

An allowance for inventory write-down is made for each inventory item whose cost exceeds its net realizable value. For work in progress related to services, the allowance is determined for each type of service with separate pricing. Increases or decreases in the allowance balance required at the end of the financial year are recognized in cost of goods sold.

5. Principles for recognition and depreciation/amortization of tangible and intangible fixed assets

Fixed assets are stated at cost less accumulated depreciation/amortization. Cost comprises all expenditures incurred by the Company to acquire the asset up to the point at which the asset is ready for use. Expenditures incurred after initial recognition are capitalized only when it is probable that they will generate additional future economic benefits; otherwise, they are recognized as expenses in the period.

Upon disposal or liquidation of fixed assets, both cost and accumulated depreciation/amortization are derecognized, and any resulting gain or loss is recognized in profit or loss for the year.

Depreciation/amortization is calculated using the straight-line method over the estimated useful lives as follows:

Asset Type	Depreciation Period (Year)	
	Current year	Prior year
- Buildings and structures	05 – 25 years	05 – 25 years
- Vehicles	06 years	06 years
- Machinery and equipment	03 – 07 years	03 – 07 years
- Management Tools and Equipment	03 years	03 years
- Computer Software	03 years	03 years

The historical cost of fixed assets and depreciation periods are determined according to Circular No. 45/2013/TT-BTC dated April 25, 2013, issued by the Ministry of Finance, and other regulations regarding the management, use, and depreciation of fixed assets, as well as amended and supplemented document.

6. Principles for recognition and allocation of prepaid expense

Prepaid expenses relating only to production and business activities within the year are recognized as short-term prepaid expenses and expensed within the year.

The recognition and allocation of long-term prepaid expenses to production and business expenses for each accounting period are based on the nature and extent of each type of expense, applying appropriate allocation methods and bases. Prepaid expenses are amortized on a straight-line basis over the relevant periods.

7. Principles for recognition of liabilities and accrued expenses

Liabilities and accrued expenses are recognized for amounts payable in the future in respect of goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts to be paid.

The classification of liabilities into trade payables and other payables is based on the following principles:

HANOI BEER TRADING JOINT STOCK COMPANY
183 Hoang Hoa Tham, Ngoc Ha Ward, Ha Noi
FINANCIAL STATEMENTS
NOTES TO THE FINANCIAL STATEMENTS (continued)

- Trade payables represent obligations of a commercial nature arising from the purchase of goods, services, and assets from suppliers who are independent of the Company, including payables arising from imports through entrusted agents.
- Accrued expenses represent amounts payable for goods and services received from suppliers or provided to customers but not yet paid due to the absence of invoices or incomplete supporting documentation, as well as amounts payable to employees for accrued annual leave and other expenses that need to be accrued.
- Other payables represent non-commercial obligations that are not related to the purchase, sale, or provision of goods and services.

8. Principles for Recognition of Dividends and Profits Payable

Dividends and profits payable are recognized at the amounts payable in the future in respect of dividends and profits payable (in cash or non-monetary assets), as well as the settlement of dividends and profits payable in cash to the Company's shareholders and capital-contributing members.

The Company recognizes dividends and profits payable when it no longer has the right to refuse its obligation to pay dividends or profits to its shareholders and capital-contributing members in accordance with applicable laws and regulations. The timing of recognition and payment of dividends and profits is determined as follows: For enterprises subject to securities laws and regulations, the date on which the investee no longer has the right to refuse dividend payments shall be determined in accordance with the provisions of securities laws and regulations.

9. Principles for recognition of equity

Contributed capital

Contributed capital is recognized based on the actual capital contributed by the owners.

Profit distribution

Profit after corporate income tax is distributed to shareholders after appropriations to funds in accordance with the Company's Charter and applicable laws, and as approved by the General Meeting of Shareholders.

Profit distribution takes into consideration non-cash items included in undistributed earnings that may affect cash flows and dividend-paying capacity, such as gains from revaluation of assets contributed as capital, gains from revaluation of monetary items, financial instruments, and other non-cash items

Dividends payable to shareholders are recognized as liabilities in the Company's Balance Sheet after the issuance of the Annual General Meeting of Shareholders' resolution, the Board of Directors' resolution, and the notification of the record date for dividend entitlement by the Vietnam Securities Depository.

Other funds

Other funds are appropriated and utilized in accordance with the Company's Charter and resolutions approved annually by the General Meeting of Shareholders.

10. Principles for recognition of revenue and income

Revenue is recognized when it is probable that economic benefits will flow to the Company and such benefits can be measured reliably. Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts, sales allowances, and sales returns. The following specific conditions must also be satisfied for revenue recognition:

Revenue from Sales

Revenue from the sale of goods is recognized when all of the following conditions are met:

IG T
PHÂN
DUNG
BIA
NÓ

HANOI BEER TRADING JOINT STOCK COMPANY

183 Hoang Hoa Tham, Ngoc Ha Ward, Ha Noi

FINANCIAL STATEMENTS

NOTES TO THE FINANCIAL STATEMENTS (continued)

- The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- Revenue can be measured reliably. Where contracts provide customers with the right to return goods under specified conditions, revenue is recognized only when such conditions no longer exist and the customer no longer has the right to return the goods (except where returns are made in exchange for other goods or services);
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from Service Provision

Revenue from rendering of services is recognized when the outcome of the transaction can be measured reliably. Where services are rendered over multiple periods, revenue is recognized in the period based on the stage of completion as at the balance sheet date. The outcome of a service transaction can be measured reliably when all of the following conditions are met:

- Revenue can be measured reliably. Where contracts provide customers with the right to return services under specified conditions, revenue is recognized only when such conditions no longer exist and the customer no longer has the right to return the services;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The stage of completion of the transaction at the balance sheet date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Interest income

Interest income is recognized on an accrual basis, determined based on the outstanding balances of deposits and the applicable interest rates for each period.

Dividends and profit distributions

Dividends and profit distributions are recognized when the Company's right to receive payment is established. Dividends received in shares are recognized by tracking the increase in the number of shares only, without recognizing the value of such shares.

Deductions from revenue

This item reflects amounts deducted from revenue from sales of goods and rendering of services arising during the year, including trade discounts, sales allowances, and sales returns. This account does not include taxes deducted from revenue, such as output VAT payable under the direct method. Revenue adjustments are accounted for as follows:

- Trade discounts, sales allowances, and sales returns arising in the same period as the related revenue are deducted from revenue of that period;
- Where goods or services were sold in prior periods but trade discounts, sales allowances, or sales returns arise in subsequent periods, revenue is adjusted as follows:
 - + If such adjustments arise before the issuance of the financial statements, they are treated as adjusting events after the balance sheet date, and revenue is reduced in the financial statements of the reporting period (prior period).
 - + If such adjustments arise after the issuance of the financial statements, they are recognized as a reduction of revenue in the period in which they arise (subsequent period).

Y
N
MAI
A N

11. Principles for recognition of cost of goods sold

Cost of goods sold represents the cost of goods and services sold during the year. It also includes costs related to investment property operations such as depreciation, repair and maintenance expenses, and operating lease expenses for investment properties (where such amounts are not significant), among others); ...

Allowance for inventory write-down is recognized in cost of goods sold based on the quantity of inventories and the difference where net realizable value is lower than cost. In determining the quantity of inventories requiring provision, inventories that have been committed under sales contracts (with net realizable value not lower than carrying amount) but not yet delivered to customers are excluded, provided there is reliable evidence that customers will not cancel the contracts.

12. Principles for recognition of financial expenses

Financial expenses reflect expenses and losses arising from financial activities, including expenses related to financial investments, borrowing and lending costs, contributions to joint ventures and associates, losses from disposal of short-term securities, transaction costs for securities trading, allowance for diminution in value of trading securities, impairment losses on investments in other entities, losses from foreign currency transactions, and foreign exchange losses...

13. Principles for recognition of selling expenses and general and administrative expenses

Selling expenses represent actual costs incurred in the process of selling products, goods, and rendering services, including marketing and promotional expenses, advertising, sales commissions, warranty expenses (excluding construction activities), storage, packaging, transportation, and related costs,...

General and administrative expenses represent general management costs of the enterprise, including salaries, wages, and allowances of administrative staff; social insurance, health insurance, trade union fees, and unemployment insurance contributions for administrative personnel; office supplies, tools and equipment, depreciation of fixed assets used for administrative purposes; land lease expenses and license tax; allowance for doubtful debts; purchased services (such as electricity, water, telephone, fax, asset insurance, fire insurance, etc.); and other cash expenses (such as client entertainment and customer conferences...).

14. Principles for recognition of corporate income tax expenses

Corporate income tax expense recognized in the Statement of Profit or Loss comprises current corporate income tax expense and deferred corporate income tax expense.

Current corporate income tax expense is determined based on taxable income and the applicable corporate income tax rate for the current year.

Deferred corporate income tax expense is determined based on temporary differences between accounting and tax bases, non-deductible expenses, adjustments to non-taxable income, and tax loss carryforwards.

15. Segment reporting

Segment reporting includes segments by business lines or by geographical areas.

Business segments: A distinguishable component of an enterprise engaged in providing individual products or services, or a group of related products or services, that is subject to risks and returns different from those of other business segments.

Geographical segments: A distinguishable component of an enterprise engaged in providing products or services within a particular economic environment that is subject to risks and returns different from those of components operating in other economic environments.

HANOI BEER TRADING JOINT STOCK COMPANY
183 Hoang Hoa Tham, Ngoc Ha Ward, Ha Noi
FINANCIAL STATEMENTS
NOTES TO THE FINANCIAL STATEMENTS (continued)

16. Financial instruments

Initial recognition

Financial assets: At initial recognition, financial assets are measured at cost plus transaction costs directly attributable to the acquisition. The Company's financial assets include cash and cash equivalents, short-term receivables, other receivables, and held-to-maturity investments.

Financial liabilities: At initial recognition, financial liabilities are measured at cost less transaction costs directly attributable to the issuance. The Company's financial liabilities include trade payables, other payables, accrued expenses, and borrowings.

Subsequent measurement

Currently, there are no specific regulations on the subsequent measurement of financial instruments.

17. Related parties

Parties are considered related if one party has the ability to control or exercise significant influence over the other in making financial and operating policy decisions. Parties are also considered related if they are under common control or common significant influence

In assessing related party relationships, the substance of the relationship is given priority over its legal form.
